# ES Net Connects You to a Smarter Life Safety Network

Discover how ES Net IP networking can improve design, installation, and maintenance of your life safety network.

Upgrade your entire network in minutes

Perform multiple operations at once

Higher bandwidth helps deliver better performance and stability across the network

The option to use multiple network topologies such as star and ring helps ensure greater flexibility when expanding the network

---

Industry Standard IP Technology

IP networking is a proven, reliable technology. The ES Net platform takes advantage of the latest IP developments and is positioned to incorporate future technology developments.

Expanded Media Card Support Increases Your Options

Choose Ethernet, DSL, or single-mode or multi-mode fiber to leverage existing infrastructure and create a network tailored to each facility. Supports longer distances up to 25 km (82,000 ft) with single-mode fiber.

Faster Data Rate Enhances Efficiency

Experience faster performance and greater reliability with minimal downtime.

Advanced Diagnostics Help Keep Systems Performing

Faster, easier pinpointing of performance and connection issues improves reliability and uptime.
