

## Features

### Manual fire alarm stations for releasing applications:

- Double action push and pull operation with a normally open (N.O.) contact
- Current limited model is available with series connected 560  $\Omega$  resistor for Style C operation (current limited = alarm; open or short = trouble)
- Operation complies with ADA requirements
- Pull lever protrudes when alarmed
- Break-rod is supplied (use is optional)
- Label kit provides six varieties of releasing applications (ordered separately)
- Screw terminals for wiring connections

### Tamper resistant reset key lock (keyed same as Autocall fire alarm cabinets)

### Multiple mounting options:

- Surface or semi-flush with standard boxes or matching Autocall boxes
- Flush mount adapter kit
- Adapters are available for retrofitting to commonly available existing boxes

### UL listed to Standard 38

## Operation

**Double Action Push Type Manual Release Stations** require that a spring loaded interference plate (marked PUSH) be pushed back to access the pull lever of the single action station, reducing the possibility of an accidental activation. A firm downward pull of the lever then activates the alarm switch, breaking an internal plastic break-rod, visible below the pull lever.

Break-rod use is optional. Use of a break-rod can provide an additional reduction of the possibility of an accidental activation without interfering with the minimum pull requirements needed for easy activation.

When activated, the pull lever latches into the alarm position and remains extended out of the housing to provide a visible indication.

**Station reset** requires the use of a key to reset the manual station lever and deactivate the alarm switch. (If the break-rod is used, it must be replaced.)

**Station testing** is performed by physical activation of the pull lever. Electrical testing can be also performed by unlocking the station housing to activate the alarm switch.

**Fig 1: Double Action Push Type Manual Release Station (shown with sample release label)**

## Label Selection

A blank area on the front of the station allows the selection of a label to match the specific release application (label kit is ordered separately).

(Refer to data sheet *AC2099-0007* for standard Autocall manual stations.)

## Product Selection

SKU	Description
A2099-9149	Standard operation, N.O. contact
A2099-9152	For Style C operation, N.O. contact with series connected 560 $\Omega$ resistor
A4099-9802	Label kit; select the label required for the specific release application; types include: Clean Agent, Extinguishing, Carbon Dioxide, Foam System, Sprinkler, and Manual

SKU	Description	Reference
2975-9178	Surface mount red box	Refer to page 3 for dimensions
2975-9022	Steel Cast aluminum	
2099-9813	Semi-flush trim plate for double gang switch box, red	Typically for retrofit, refer to page 4 for details
2099-9814	Surface trim plate for Wiremold box V5744-2, red	
2099-9819	Flush mount adapter kit	Refer to page 4 for details
2099-9820	Black Beige	
2099-9804	Replacement break-rod	

## Specifications

<b>Wire Connections</b>	Screw terminal for in/out wiring, for 18 to 14 awg wire (0.82 mm <sup>2</sup> to 2.08 mm <sup>2</sup> )
<b>Temperature Range</b>	32° to 140° F (0° to 60° C) intended for indoor operation
<b>Humidity Range</b>	Up to 90% RH at 90° F (38° F)
<b>Housing Color</b>	Red with white raised lettering
<b>Material</b>	Housing and pull lever are Lexan polycarbonate or equal
<b>Pull Lever Color</b>	White with red raised lettering
<b>Housing Dimensions</b>	5" H x 3-3/4" W x 1" D (127 mm x 95 mm x 25 mm)
<b>Installation Instructions</b>	574-686AC

## Semi-Flush Mounting Reference

## Surface Mounting Reference

**Preferred Mounting.** For surface mounting, the preferred electrical boxes, the 2975-9178 Box and 2975-9022 Cast Box, are shown in the illustration.

**Additional Mounting Reference.** Refer to [Additional Mounting Information](#) on page 4
