

AUTOCALL FOUNDATION SERIES

# PRODUCT CATALOG

 **AUTOCALL**  
NEVER COMPROMISE

You expect superior technology and innovative features from Autocall products – and the Autocall Foundation Series delivers, bringing fire detection systems of exceptional quality, ease and flexibility to smaller, less complex facilities.

The Foundation Series embodies the Autocall “no compromises” commitment. With a full line of addressable and conventional systems to fit every facility, there’s no compromise on choice. You also get uncompromised flexibility – in installation and in your choice of central station connectivity: IP LAN, IP cellular or standard telephone line. And Foundation Series addressable systems doesn’t compromise on ease of programming either. Every unit comes with a unique QR code, so all you need is the free mobile app and a touch of your smartphone to the control unit.

Industry-leading technology. Thoughtful, meaningful innovation. Value that begins at installation and lasts for years. Your everyday projects have never had access to a world-class fire detection system like the Autocall Foundation Series.

# NO COMPROMISES ON QUICK AND EASY INSTALLATION

The Autocall Foundation Series puts innovation to work to deliver big benefits to contractors, building owners and facility managers. The family includes a complete line of addressable and conventional control units and a broad choice of sensors and notification appliances.

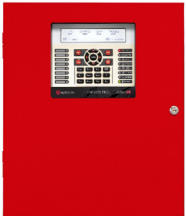

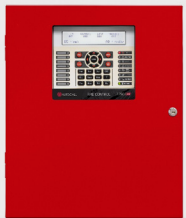

Find out all the reasons why the Autocall Foundation Series is ideal for your less complicated projects. **VISIT [AUTOCALL.COM](http://AUTOCALL.COM) OR CALL YOUR LOCAL AUTOCALL REPRESENTATIVE.**

# Control units

Autocall Foundation Series control units are as smart as they are easy to install and program. They look great, fit virtually anywhere – and technicians can get them up and running in no time without special training.

Product	Part number	Description
	A004-9101	The conventional 2004FS provides 4 zones of detection, 1 synchronized NAC, an on-board conventional DACT and a LED user interface. Programmable using integrated DIP switches, the 2004FS supports up to 2 LED annunciators.
	A008-9101	Higher capacity than the 2004FS, the conventional 2008FS supports up to 8 zones of detection, 2 synchronized NACs, 4 LCD annunciators and an on-board DACT. It includes a 2x20 LCD and membrane keypad for easy use and may be programmed at the panel or using PC-based software.
	A050-9101	Upgrade your system with addressable technology. 2050FS supports up to 50 MX addressable detection devices, 2 synchronized NACs and up to 8 LCD annunciators. The user interface is a large 4x40 LCD and membrane keypad. Highly flexible and easy to configure either a mobile app or PC-based programming tool, the 2050FS offers central station communication using an IP-DACT that supports land-line telephone, ethernet or cellular connections.
	A250-9101	Foundation Series' highest capacity control unit, the MX addressable 2250FS supports up to 250 addressable detection devices, 4 synchronized NACs and up to 8 LCD annunciators. The large 4x40 LCD and membrane keypad makes the system simple to use, and configuration can be done using a mobile app or PC-based programming software. Central station communication is available using an IP-DACT that supports land-line telephone, ethernet or cellular connections.

# Initiating devices

Job #1 for any fire detection system is to positively identify a fire threat early enough to save lives and property damage. Autocall Foundation Series initiating devices do just that, providing reliable, accurate fire detection while keeping nuisance alarms to an absolute minimum. Since every facility is different, you have a broad range of addressable and non-addressable devices to choose from – including multi-sensor detectors for superior protection.

# Modules

Add greater flexibility and performance to certain conventional devices with Autocall's addressable modules. Including multi-point modules, modules that permit individual reporting from flow and tamper switches on the same circuit, and isolator modules that protect power wiring from short circuits and ground faults, Foundation Series has the right product for your project.

# Annunciators

Having continuously visible and accurate status updates is crucial to an effective fire alarm system. Available in both LCD and LED versions, Foundation Series annunciators deliver precise alarm locations, call attention to system issues and enable remote status information and system controls.
